Print Server

The print server function supports MFP, RAW, LPR and IPP printing methods.
The printer should be connected to USB port 2 (located at the back of myDitto).
In order to print from your PC please refer to the user manual.

Note: In order to use external disk at myDitto the print server must be disabled.

☐ **Enable Print Server**

Print Server Name :	PSba0df4
Print Name of USB Port :	lpt1

Storage Tools

Manages the server's storage structure (JBOD, RAID 0 or RAID 1) as well as the format and partition of the internal and external storage devices.

In order to avoid data or hard drive damage, before applying any function, make sure the server is not being used by any user.

For the internal SATA hard disk drivers, the server only allows performing "Auto Partition & Format". Only external USB storage devices attached to partitioned and formatted.

Check & Fix Disk
