

1. Read the text and give the Malagasy meaning of the words underlined

The United States is a very large country, and climates and weather can vary greatly by season and location.

- **Summer:** June - August
- **Fall:** September - November
- **Winter:** December - February
- **Spring:** March - May

During summer, northern states enjoy warm — even hot — days and cooler mornings and nights, while southern states and tropical areas experience very hot temperatures.

In the fall, temperatures begin to cool down around the country. This is a welcome season in northern regions, where leaves change to beautiful shades of red, yellow and orange.

Winter is fairly mild in the southern states, while the northern, northeastern, midwestern, western mountains and Great Plains regions often encounter snow and colder temperatures.

During the spring, temperatures begin to warm up and thunderstorms and rainstorms are common across the country into the summer months.

Correction:

Vary greatly: **miovaova be**

Location: **toerana**

Northern states: **faritra avaratra**

Cooler: **mangatsiatsiaka**

Cool down: **mihamangatsiatsiaka**

Southern states: **faritra atsimo**

Tropical: **mafana**

Shades: **aloka**

Regions: **Faritra**

Mild: **matimaty, malefaka, antonintoniny**

Northeastern: **avaratra atsinanana**

Midwestern: **andrefana afovoany**

2-Translate in Malagasy.

Ny Amerika dia tany midadasika. Ary ny vanim-potoana sy ny toetr'andro dia miovaova be manaraka ny vanin'andro sy ny toerana.

-Fahavaratra: Jona-Aogositra

-Lohataona: Septambra -Novambra

-Ririnina: Desambra- Febroary

-Fararano: Martsa -May

Mandritra ny fahavaratra, misitraka andro mafana ny faritra avaratra, indraindray mafana be – malefandefaka kosa izany ny maraina sy ny alina raha toa kos any faritra atsimo sy ny toerana tropikaly dia ahitana hafanana be.

Amin'ny lohantaona indray ny mari-pàna dia manomboka miha-mangatsiatsiaka ny manondindinan'ny firenena. Io no fiandohan'ny vanim-potoanan'ny toetr'andro any amin'ny faritra avaratra izay hiovan'ny ravin-kazo ho tsara miloko mena sy mavo ary volomboasary.

Ny ririnina dia saika somary malefaka any amin'ny faritra atsimo raha toa ny any avaratra, sy ny afovoany andrefana sy ny andrefan'ny tendrombohitra ary ny lemaka kosa matetika dia ahitana ranomandry sy mari-pàna mangatsiaka.

Mandritra ny fararano, ny mari-pàna dia manomboka miha-mafana, ary ny hita matetika manerana ny tanàna dia kotro-baratra sy oram-baratra mandritra ny volan'ny fahavaratra.
