NOTES

5th and last preparation game before the start of the championship next Sunday.
The players who started the game were the potential starters of the next game which will be our start in the championship.
We underwent the pressure of the opponent from the beginning of the game and did not manage to build our possession phases as we wanted.

In the possession phase, we abused the long passes under the pressure of the opponent during the first 25 minutes and gave the ball back to the opponent almost on each of our long passes by lack of solutions between the lines.
The opponent imposed us a high pressure with a compact team block, which destabilized us in the construction phase.
We took the first and only goal of the game on a placed attack of the opponent which ends in 1v1 in front of the goal.

Defensively, we were in difficulty in front of the speed of their wide midfielders who systematically managed to unbalance us in the corridor by bringing the numerical superiority by their full backs.
The score could have been more severe without the excellent performance of Valentin who allowed us to keep us in the game until the last minute when we missed our last action by Oussama.

Very formative game against a team which will play the top 3 in championship.

Top : Valentin, Arnaud

Injuries: /
