MONA LISA

LEONARDO DA VINCI

The painting is considered an enigma. For many years, historians could not figure out who the woman was. The official explanation is that the lady posing could be Isabella d'Este, the wife of Francesco del Gonzaga. Can you look to draw children and to identify the scene, Fraumeyer investigated a portrait by Leonardo da Vinci. During the night of August 30th, 1503, an Italian man, Niccolò Perugino stole the Mona Lisa and brought it back to Italy. The painting was finally found two years later. It was on display for a while in Florence before coming back to the Louvre Museum.

Leonardo used a technique called sfumato which means "to smoothen". It takes 15 seconds to find the hidden message in the Mona Lisa. Can you identify it?

Which color is the most famous part of Mona Lisa's face?
