PROGRAM OBJECTIVES

Professional skills

- To learn purchasing and negotiation techniques
- To develop a strategic management of flows within a digital environment
- To anticipate, plan, optimize and manage supplies, transportation, inventory and sales
- To manage information systems, quality control and optimize the project plan
- To analyze risks and costs
- To understand and control the strategic impacts of supply chain operations
- To address eco-logistics and sustainable development issues.

Soft skills

In order to develop managerial skills in a corporate environment and enhance employability, the « Leadership and Development of Soft Skills » program provides personalized coaching and support.

Students are accompanied using an approach that promotes sustainable human development.

A soft skills referential has been elaborated based on the expectations of international organizations.

Students follow a program in several phases :

- Self-evaluation
- Coaching to improve specific skills
- Review and formulation of a personal development plan.

« The management of the production and crossborder distribution of products and services are under the pressure of worldwide trends of sustainability and digital transformation. These challenges require a new breed of minds capable of handling large amounts of data to make the right operational decisions while taking into account the impact of supply chains on the environment. Collaboration within and across organizations and out of the box thinking are key competencies that are targeted by our training program. We believe that understanding the theory behind supply chains and how it relates to these trends is key to effective purchasing and supply chain management. »

Dr Adib Bensalem, PhD

Associate Professor of Supply Chain Management,
ESCE Paris

MSc Coordinator

Research areas : Supply Chain Strategy,
Digital logistics

BALMAIN
PARIS

«The diversity of classes offered allowed to grasp a global vision of the supply chain from end to end. It helped us understand what is at stake in managing supply chains. Furthermore, the quality of the instructors, both academic professors and professionals, allowed us to link the theory seen in class to the field reality.»

Anaïs Madonna

Chassis forging parts Buyer at Groupe PSA

« A solid training based on a faculty from various backgrounds has guided us throughout our apprenticeship in analysing the different topics from both an academic and professional standpoint.»

Gabriella Ferrari

Sustainability consultant at INCO
